Sustainability.....6

Ensuring that all packaging where used is recycled for the secondary market

Product Range.....7

Cookware and bakeware full ranges and specifications

Contact us

Pargat

Pargat is a private manufacturing business that recognises the demand for high quality aluminium cookware and bakeware products for the retail market.

Our clients include major supermarket chains and retailers throughout the UK, Europe and USA. Our manufacturing facilities extend to some 14,000 sqm of production floor space. In-house warehousing allows for storage and distribution of products to our retail customers on time every time.

Over many years of continuous investment in research and development, our high-tech manufacturing methods have aided our state of the art CNC production lines, ensuring that we can expertly manufacture large quantities of aluminium cookware and steel bakeware to the highest quality and standard required.

Through consolidation, raw material purchases are standardised where possible to achieve cost reduction. The LME is tracked and strategic trades are made. Buffer stocks are carried as a hedge against fluctuations in the markets.

Products and tooling are designed to enable the implementation of advanced manufacturing techniques. These include the quick changeover of tools and 'just in time' production scheduling. The incorporation of EDI (electronic data interchange) further improves factory response to changes in demand.

The utilisation of high density storage and advanced stock control software, improves efficiency and reduces inventory. We are able to use customer vehicles for back haul, cutting the cost of distribution and reducing our carbon footprint.

Pargat have built their business and reputation based on the continuing commitment to product quality, value, delivery and customer service.

Heritage® and Le Cook® branding

We are able to supply ready branded Cookware and Bakeware under our own labels - 'Heritage' and 'Le Cook', should you require.

Cookware

Value Range

Value Range aluminium cookware with non-stick coating, available in a metallic grey, black or *coloured exterior finish.

Core Range

Core Range aluminium cookware with a multi-layered non-stick coating, available in a pewter, black or *coloured exterior finish.

Bakeware

Value Range

Value Range - steel with a non-slip coating. Cake, bake and roasting trays. Loaf tins and pie dishes. Heat resistant to 230°C, 450°F, gas mark 8.

Classic Range

Full range of steel bake and ovenware with a two layer non-stick coating. Loose-based cake tins, muffin trays, pudding bowls and bake and roasting trays. Heat resistant to 230°C, 450°F, gas mark 8.

Vitreous Enamel Range

Vitreous Enamel - Full range of scratch and chip resistant trays, roaster ovenware and grill trays. All suitable for use with induction, oven, barbeque and naked flame.

Sustainability

As part of our Green Credentials, Pargat are continually looking to implement technologies that reduce our carbon footprint. Our heating and lighting is highly efficient. The plant and equipment incorporates technology that regenerates electricity for the grid, reducing the power required per unit of production.

All packaging where used is recycled for the secondary market. The tooling is designed to enable advanced manufacturing techniques, this includes the quick changeover of tools and 'just in time' production scheduling. The incorporation of EDI (electronic data interchange) further improves factory response to changes in demand.

Pargat Product Range

- 90% of raw material sourced from UK and Europe for the highest quality steel and components
- All products manufactured by Pargat at our UK factory
- Our stock holding capability allows you to call off committed stock on a 3 day lead time
